

ĐỀ 1

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

Where is the train [station / school / market] in this town?

The bus [runs / stops / flies] here every morning.

The traffic light is [red / yellow / green] so you can go now.

We usually have [breakfast / lunch / dinner] at 7 p.m.

Do you like watching [books / movies / hotdog] on weekends?

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	I arrived at the shop early in the morning, but it was crowded with people.
	I might return to try different types of drinks next time.
	A waiter assisted me in finding a table and handed me the menu.
	The sandwich was both delicious and beautifully presented.
	The menu was not as good as expected and quite pricey, so I decided to order a sandwich.

Question 3 of 5: Put the sentences below in the right order.

	Now things have changed, actors and filmmakers can earn thousands of dollars from film production.
	Due to the lack of money, actors also had few opportunities to earn money through acting.
	Not only did these technological limitations exist, the movies were also low budget.
	Old movies were very different from today's movies.
	That's because the movies were only in black and white, and sometimes without sound.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: I stayed until the very last moment of the festival and absolutely loved the grand finale. The stage lit up with dazzling lights and fireworks, creating an unforgettable atmosphere. Although getting there was a hassle due to heavy traffic and packed buses, once I arrived, all those inconveniences faded away. In the end, the final performance made every bit of the struggle worthwhile.

B: Normally, I steer clear of festivals, but I decided to give this one a try. Unfortunately, I didn't have a great time. The sound quality was poor, the event schedule seemed chaotic, and to top it off, it started raining heavily. The muddy ground made things even worse, and I spent most of the day feeling uncomfortable. Honestly, I didn't think it was worth the trouble. The only highlight for me was the beautiful park where the festival took place.

C: I really enjoyed the lively atmosphere created by the music. One of the bands on the opening night was so amazing that I couldn't help but sing along. However, everything was quite expensive. The tickets were pricey, and the food and drinks were ridiculously overcharged. I ended up spending more than I had planned. Even though the performances were great, I do hope the organizers will bring the prices down next year.

D: For me, the most memorable part of the festival was its location. The park by the river was vast and picturesque, with plenty of spots to sit and unwind between performances. I enjoyed a nice lunch there, though it was a bit pricey. Some of the shows were enjoyable, but I didn't stay for the entire event. Overall, it was the venue that left the biggest impression on me.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who didn't like the festival overall?				
Who thought it was too expensive?				
Who loved one of the performances?				
Who liked the location?				
Who experienced bad weather?				
Who liked the final performance of the show?				
Who found the traffic difficult?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Mountain

Paragraph 1: The term "mountain" has evolved over time, reflecting not only physical characteristics but also cultural significance. In contemporary discussions, mountains may symbolize challenges to overcome or destinations for adventure, transcending their geographical attributes.

Paragraph 2: Climbing a mountain often leads to a profound sense of accomplishment. It represents not just reaching a physical summit but also conquering personal fears and pushing one's limits, creating memories that last a lifetime.

Paragraph 3: In today's digital age, sharing achievements has become prevalent. Climbing a mountain is frequently documented on social media, turning personal milestones into public spectacles that inspire others while also raising questions about authenticity.

Paragraph 4: The pursuit of climbing mountains can sometimes lead to misplaced priorities. While seeking adventure and recognition, individuals may neglect personal relationships or responsibilities, emphasizing the need for a balanced approach to life.

Paragraph 5: Engaging in extreme sports, such as mountain climbing, can forge strong bonds among participants. However, it may also create worrying connections where individuals prioritize adrenaline over safety, potentially leading to dangerous situations.

Paragraph 6: While adventure is thrilling, there is a growing recognition of the importance of stability in life. Balancing the desire for adventure with the need for security is crucial, prompting individuals to reflect on their life choices and long-term goals.

Paragraph 7: Shared experiences in challenging environments, like mountains, can deepen intimacy in relationships. Couples or friends who navigate the challenges of climbing together often find their bonds strengthened through mutual support and understanding.

HEADING	
Worrying connections	
The unique feeling of achievement	
Changing the definition of mountain	
The mistake of misplaced priorities	
Focus on stability	
Intimate relationships	
Publicity of achievement	

ĐỀ 2

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

I always study in the [morning / sea / roof] before school.

My [friends / dog / tree] and I play football after class.

I always [leave / go / love] my bag on the chair.

Apples are very [hate / lovely / good] for your health.

We eat rice and [food / books / games] every day.

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	You should also compare that place with your own country.
	It is important to learn about the people and the history there carefully.
	Such comparisons will make your writing more interesting and meaningful.
	Before writing about a place, you need to do some research on it.
	Even if you can not visit the place, your writing will still look similar to real experiences.

Question 3 of 5: Put the sentences below in the right order.

	In the old days, films were only in black and white, and sometimes even without sound.
	In addition to these technological limits, producers had very low budgets.
	Movies today are very different from movies in the past
	Because of the lack of money, actors also earn little money from acting.
	Nowadays, everything has changed: actors and producers can earn a lot of money from producing films.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: Before diving into any extreme sport, I truly believe it's crucial to undergo proper training. While these activities can be thrilling, they also carry risks if you're not well-prepared. I've witnessed people injuring themselves simply because they didn't take the necessary precautions. That's why I always make sure to complete a training program and familiarize myself with the safety guidelines before trying something new. With the right preparation, extreme sports can be an amazing experience.

B: I've always had a fondness for more traditional sports such as swimming, running, and tennis. They're enjoyable and easy to incorporate into a routine. However, a few months ago, I had the chance to go bungee jumping during a vacation, and it turned out to be an unforgettable experience. I didn't anticipate having so much fun! While I still prefer regular sports for daily exercise, I now feel much more open to trying extreme sports occasionally for the thrill.

C: What I appreciate most about extreme sports is the unique way they allow me to connect with nature. Activities like rock climbing and mountain biking enable me to explore stunning landscapes while also pushing my physical and mental limits. It's an escape from the everyday routine, and it makes me feel truly alive. If I had more time and resources, I would love to engage in these sports more frequently, particularly in wild, remote locations.

D: I understand that some people find extreme sports exhilarating, but they've never been significant to me. In fact, I try to avoid them whenever I can. I'm not fond of the idea of placing myself in risky situations just for the sake of excitement. There are many safer alternatives to staying active and enjoying life. I'd much rather take a peaceful walk or do some yoga than jump out of an airplane or scale a mountain. It's simply not my cup of tea.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who wants to play more extreme sport?				
Who finds training before participating is important?				
Who finds extreme sport unimportant?				
Who enjoys nature?				
Who likes traditional sports like swimming?				
Who always avoids playing extreme sport?				
Who still likes extreme sports after playing once?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Four-Day Workweek

Paragraph 1: For many years, a workweek of five or even six days was the standard. However, advancements in technology, evolving social values, and an increasing emphasis on work-life balance are making this traditional schedule less relevant. Both employees and employers are starting to question whether spending the majority of one's week at work is truly necessary or productive.

Paragraph 2: Proponents of a four-day workweek highlight various benefits for workers. With an extra day off, employees gain more time to recharge, connect with family, or explore personal interests. Research shows that shorter workweeks can enhance focus and efficiency, leading to improved job performance and higher levels of job satisfaction.

Paragraph 3: While appealing, a reduced workweek could have financial downsides. Companies might incur higher expenses from the need to hire additional staff or adjust compensation models. For sectors that rely on hourly employees, it may be difficult to maintain profitability, potentially leading to service reductions or job cuts.

Paragraph 4: Adapting to a new work schedule can be difficult for some employees. The pressure to complete tasks within a shorter timeframe can lead to stress, and fast-paced industries may face challenges such as missed deadlines or conflicting schedules, complicating the transition to a shorter workweek.

Paragraph 5: For individuals accustomed to traditional work hours, the shift to a four-day workweek can be challenging. Breaking long-established routines is tough, and some may resist change even when it offers potential benefits. Adapting to a new work pattern often requires time and support.

Paragraph 6: While a four-day workweek may sound ideal to many, it isn't necessarily fair to all. Essential workers, healthcare providers, and employees in the hospitality industry may not have the option to reduce their hours. This could create disparities among different worker groups and lead to tension within the workforce.

Paragraph 7: Rather than universally implementing a four-day workweek, experts suggest considering more flexible arrangements. Options such as allowing employees to choose their days off or offering shorter daily hours can provide similar advantages without disrupting industries that depend on a traditional work schedule.

HEADING	
Undesirable financial consequences	
Difficult to change old habits	
Benefits for employees	
Unfair for some people	
Unforeseen challenges for employees	
A way of life now out of date	
Alternative solutions worth considering	

ĐỀ 3

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

Where is your [home / sea / park]?

Do you talk to [customers / bird / chair] at work?

Is the task [easy / go / bring] for you?

What do you [prepare / big / team] in the morning?

What do you like to [watch / read / take] on TV?

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	Activities including football, swimming, skipping rope, and the children played together very happily.
	It was held on Saturday morning, there was a 10 km race for adults.
	There were 60 participants, in which Ms. Kamus kept the fastest speed and won.
	After she received the prize, the following time was for children's activities.
	After playing, the children were very hungry and ate with their parents.

Question 3 of 5: Put the sentences below in the right order.

	Thanks to his talent and personality, he became well-known to a large audience.
	Before becoming famous, he had to practice very hard every day.
	At the age of fifteen, he studied music at a special school.
	With his unique style and clothes, he soon attracted attention.
	He is a famous singer who is loved by many fans.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: In the past, I really liked playing board games. Now, to limit the children from using computers, I often spend time playing with them. However, I have struggled with them because the games nowadays have more characters and rules, making us think a lot every time we play. Despite this, my children and I still like it and have a good time together.

B: When I was a child, I often played soccer with other children of the same age. We usually played in the schoolyard and sometimes in the open spaces of the neighborhood. We divided into small teams and chased the ball until we were all tired.

C: When I was a child, I didn't like going out to play, so I chose reading books as a form of entertainment. The stories described in the pages of books helped me discover my own world. Later, when I grew up, I started liking modern games with eye-catching interfaces, which help me relax and increase my creativity.

D: When I was a child, I really liked outdoor activities. I remember that on bad weather days, I was always by the window, glued to it, looking outside and praying for the rain to stop. At those times, my mother often gave me paper and a box of crayons. I really enjoyed that drawing activity and often drew at home when the weather was bad.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who finds today's games harder than before?				
Who enjoyed playing with friends in childhood?				
Who enjoyed arts as a child?				
Who prefers modern games?				
Who waited and hoped to go outside?				
Who enjoys playing with their children?				
Who enjoyed reading books as a child?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need. (Hãy đọc nội dung và chọn tiêu đề cho từng đoạn văn).

Topic: Digital transformation (Tech Forward)

Paragraph 1: The interaction between people and technology is continuously evolving. Modern gadgets and software are designed to be more user-friendly, enabling communication through voice commands, gestures, or even facial recognition. This transformation makes technology more intuitive and accessible, enhancing both personal and professional experiences.

Paragraph 2: Smart automation tools are revolutionizing workplaces by handling repetitive and time-consuming tasks. These technologies, often powered by AI, enable employees to concentrate on more valuable work, boosting efficiency and fostering innovation across various sectors.

Paragraph 3: Educational institutions are increasingly incorporating technology into their curricula to prepare students for future careers. Programs focused on coding, robotics, and digital literacy provide learners with vital skills for the digital age, promoting creativity and enhancing problem-solving abilities.

Paragraph 4: Although digital devices offer numerous advantages, over-reliance on screens can lead to negative consequences. Individuals may experience reduced social interactions, trouble concentrating, and higher stress levels. It's crucial to balance digital engagement with offline activities for maintaining mental and physical well-being.

Paragraph 5: Not everyone has equal access to technology, which can result in significant social and economic divides. Those without reliable internet or modern devices may miss out on educational and employment opportunities, making it essential to address these inequalities through policies and community-driven efforts.

Paragraph 6: Tech communities unite individuals passionate about technology to exchange ideas, support projects, and collaborate. These groups encourage innovation and creativity, offering mentorship and resources to help transform new ideas into reality.

Paragraph 7: As technology continues to evolve, there is a growing focus on sustainability. Companies are developing eco-friendly products and adopting green practices to reduce environmental impact, ensuring that digital advancements contribute to long-term ecological health.

HEADING	
Building inclusive digital ecosystems	
Concerns about cybersecurity risks	
Promoting digital skills training	
Focusing on ethical technology development	
Redefining business models with technology	
Over-reliance on automated systems	
Enhancing productivity through automation	

ĐỀ 4

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

Do you jog in the [park / moon / tree] in the morning?

Does the gym offer [classes / running / books] for yoga?

Is English [easy / try / bye] for you?

What do you eat for [breakfast / love / cold] every day?

Do you practice [meditation / book / healthy] to relax?

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	Sixty people took part, and among them, Ms. Kamus kept the fastest pace and won the race.
	The activities were football, swimming, skipping, and more, and the kids had fun playing together.
	After she got her prize, the next part was for children's activities.
	It took place on Sunday morning in the park, there was a race for adults.
	After the games, the kids were really hungry and ate with their parents.

Question 3 of 5: Put the sentences below in the right order.

	These made traveling more accessible to everyone.
	In the past, transportation was primarily accessible to the wealthy.
	Eventually, buses and trains were introduced as affordable alternatives.
	Today, buses and trains are among the most common transportation options.
	Later, air travel became popular among business professionals.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: When I was young, I enjoyed playing simple computer games that my dad had programmed for me. Today, I teach my children to code using easy-to-use platforms like Scratch. These tools make learning programming enjoyable, though I spend time helping them grasp the logic behind it. Working together on coding fosters both creativity and teamwork.

B: As a child, I loved spending time with my friends, building and controlling toy robots. I'll never forget the thrill of making them move. Those experiences sparked my passion for technology, and I still look back fondly on those moments of discovery.

C: When I was younger, I was fascinated by science magazines about robots and computers. The articles fueled my curiosity. Now, I develop mobile apps, creating tools for daily life. Thanks to modern software, the development process has become faster, but the excitement of innovation remains the same.

D: As a kid, I spent rainy days with my siblings watching TV shows about gadgets and inventions. We eagerly awaited each new episode. Today, I prefer taking online courses to stay up-to-date with AI and blockchain. They offer flexibility and are a great way to keep pace with the rapidly changing tech world.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who loved science magazines as a child?				
Who loved playing with toy robots as a child?				
Who enjoys coding with family?				
Who finds modern tools more accessible?				
Who loved watching tech shows as a child?				
Who now enjoys app development?				
Who now prefers online learning?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Wellness trend

Paragraph 1: In recent years, the definition of health has broadened to encompass more than just physical well-being. Holistic approaches emphasize the interconnection of the body, mind, and environment, encouraging individuals to consider emotional balance, mental clarity, nutrition, and lifestyle habits collectively. This more comprehensive view helps people achieve deeper and more sustainable wellness by addressing various aspects of life rather than isolated symptoms.

Paragraph 2: Mental health has become a growing priority in public health discussions. Awareness campaigns aim to reduce the stigma surrounding mental health disorders and encourage open conversations about personal struggles. Educating people on recognizing early signs of anxiety, depression, and stress empowers them to seek help sooner. Many organizations also provide support networks and resources to build a more compassionate and understanding society.

Paragraph 3: Community-based fitness initiatives are becoming more popular as a way to make exercise enjoyable and accessible. By participating in group activities such as yoga, walking clubs, or sports leagues, individuals not only improve their physical health but also form meaningful social connections. These programs foster a sense of belonging and help individuals stay committed to their fitness goals over time, contributing to healthier and happier communities.

Paragraph 4: Although trendy diets often promise quick weight loss or improved health, relying too heavily on these fads can be problematic. Many popular diets lack scientific support and may eliminate essential nutrients, leading to unbalanced nutrition. Nutrition experts emphasize that sustainable eating should focus on balanced meals, moderation, and individual needs rather than quick fixes. Building a healthy relationship with food is more beneficial than chasing the latest diet trend.

Paragraph 5: The rise of social media and online platforms has led to widespread sharing of health information, but not all of it is accurate or safe. Misinformation about supplements, treatments, and health practices can cause confusion or even harm. It's crucial for individuals to critically assess sources, consult healthcare professionals, and rely on evidence-based guidance when making decisions about their wellness routines.

Paragraph 6: Supportive wellness-focused communities play an essential role in helping people maintain healthy lifestyles. Whether online or through local meetups, these groups offer encouragement, share tips, and provide accountability. Members can exchange experiences, celebrate successes, and find motivation during challenges, creating an environment where individuals feel empowered to achieve their health goals.

Paragraph 7: Achieving long-term health requires more than temporary diets or exercise bursts. Sustainable wellness involves making gradual changes that can be maintained over time, such as improving sleep habits, managing stress, and incorporating regular physical activity. By setting realistic goals and making incremental adjustments, individuals are more likely to experience lasting benefits and enhance their overall quality of life.

HEADING	
Overemphasis on trendy diets	
Building supportive health communities	
Focusing on sustainable lifestyle changes	
Promoting mental health awareness	
Redefining holistic health approaches	
Concerns about wellness misinformation	
Encouraging community fitness programs	

ĐỀ 5

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

Is your neighborhood [**friendly** / hate / big]?

How do you usually [run / walk / buy] to work?

When did you meet your friend [first / love / bring]?

Can you [speak / big / most] French?

Do you like going out [alone / together / morning] with your friends?

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	Over the past decade, artificial intelligence has revolutionized various industries.
	Nowadays, AI engineers build advanced models for complex tasks such as language translation.
	High computational costs previously hindered the development of AI.
	Modern AI tools help businesses to analyze data and make better decisions.
	The early AI systems were limited to simple pattern recognition tasks.

Question 3 of 5: Put the sentences below in the right order.

	After the workshops, awards were given for the most creative wellness ideas.
	This month, the wellness day took place on Friday, focusing on work-life balance.
	Activities included team yoga, time management seminars, and a group walk.
	Employees enjoyed healthy snacks and exchanged tips for managing stress.
	More than 50 employees participated, with Mr.A leading a workshop on stress relief.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: When I was a child, I enjoyed playing board games with my parents after their busy workdays. Now, I get to share that experience with my own kids, and having a four-day workweek gives us more time together. Flexible schedules are a big help, but I always make sure to plan ahead so I can balance both work and family life. These are the moments that create lasting memories.

B: As a kid, I would set up pretend offices with my friends, using toy phones and notebooks. I loved taking on the role of 'boss' and organizing our tasks. Those imaginative games taught me valuable lessons in organization and leadership, and I still laugh thinking about the 'serious' meetings we held.

C: When I was younger, I devoured books about different professions, dreaming about what my future career might be. Those books inspired my ambition. Today, I rely on productivity apps to keep track of my tasks in my four-day workweek. While the apps make my work more efficient, the excitement of organizing and planning is still the same.

D: As a child, I spent countless evenings playing tag with my friends in the neighborhood. On rainy days, though, I often found myself feeling bored indoors. Now, after work, I practice mindfulness to help me relax and recharge. It's especially helpful with a shorter workweek, as it keeps me focused and refreshed.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who enjoys family time with board games?				
Who loved reading about careers as a child?				
Who loved outdoor play as a child?				
Who now enjoys productivity apps?				
Who loved organizing pretend offices as a child?				
Who now prefers mindfulness practices?				
Who finds modern schedules more flexible?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need. (Hãy đọc nội dung và chọn tiêu đề cho từng đoạn văn).

Topic: Women mathematicians

Paragraph 1: Long before modern scientific institutions emerged, certain individuals in ancient history established the foundations of mathematics as we know it. One such pioneer was Hypatia of Alexandria, a famous philosopher and mathematician in the 4th century.

Paragraph 2: The early 20th century saw remarkable advancements in computing, largely propelled by the innovative work of figures like Alan Turing. Turing's concept of a universal machine, capable of performing any computable task, laid the foundation for modern computers.

Paragraph 3: Humanity's quest to explore the cosmos has been defined by groundbreaking milestones. From the launch of Sputnik 1 to the Apollo moon landings, each mission has broadened our understanding of space and our place in the universe.

Paragraph 4: The study of geometry and motion was irrevocably altered by the works of Isaac Newton and later Albert Einstein. Newton's laws provided the mathematical foundation for understanding motion on Earth and in space, while Einstein's theory of general relativity revolutionized our understanding of gravity.

Paragraph 5: One of the most profound ideas in modern physics is the link between symmetry and the laws of nature. Emmy Noether, a brilliant German mathematician, proved a theorem that demonstrated how physical laws are intrinsically linked to symmetrical properties.

Paragraph 6: Despite advancements in science and technology, many groups remain underrepresented in STEM fields. In recent decades, educators and organizations have worked to foster more inclusive environments, offering scholarships, mentorship, and outreach programs.

Paragraph 7: In many parts of the world, individuals have had to fight for the right to education, particularly in scientific disciplines. A well-known example is the story of 19th-century women who were denied entry to universities.

HEADING	
Breaking Through Educational Barriers	
Transforming Geometry and Motion	
Trailblazing Computer Science	
Encouraging Diversity in STEM	
Breaking New Ground in Ancient Mathematics	
Driving Space Exploration Forward	
Connecting Symmetry to Physics	

ĐỀ 6

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

I go to school by [spaceship / plane / bicycle].

The buildings in my city are very [hate / tall / went].

There are many green [road / buy / trees] near my home.

I eat [breakfast / lunch / dinner] with my family every morning.

I play [games / make / time] to feel relaxed.

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	In the past, employees followed strict nine-to-five schedules.
	Modern workplaces are adopting more flexible work models.
	Limited technology once restricted remote work possibilities.
	Today, companies experiment with shorter workweeks to boost productivity.
	Managers now use software to track project progress remotely.

Question 3 of 5: Put the sentences below in the right order.

	The event was fully planned, financed, and supported by local authorities.
	The two-hour performance thrilled the audience, leaving everyone in high spirits.
	Many attendees arrived early and browsed local shops before the event began.
	Despite the busy day, workers finished ahead of schedule and watched the famous singer perform.
	As a result, entry was free, and around five thousand people attended.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: When I was a child, I enjoyed building simple circuits with my parents using basic kits. Today, I collaborate on tech projects with my cousins using drag-and-drop coding platforms. These tools make the development process easier, but I always take the time to thoroughly test our creations. It's a wonderful way to foster creativity and work together.

B: As a kid, I played with programmable toys like robotic pets alongside my friends. I can still recall the excitement of programming their movements. Those toys sparked my interest in logic and curiosity, and I continue to cherish those early experiences with technology.

C: Growing up, I was fascinated by books about inventors and their innovative creations. Those stories inspired my imagination. Today, I design prototypes using 3D modeling software. The tools are much more precise now, but the joy of creating something new still feels just like the excitement of those childhood books.

D: I spent many hours as a child exploring my family's old computer, learning basic commands. Rainy days often meant staying indoors and experimenting with different software. Today, I keep up with the latest innovations by listening to tech podcasts. They're not only entertaining but also help me stay connected to the ever-evolving tech world.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who finds modern platforms user-friendly?				
Who now enjoys 3D modeling?				
Who loved exploring early computers as a child?				
Who loved playing with programmable toys as a child?				
Who enjoys creating tech projects with family?				
Who now prefers tech podcasts?				
Who loved reading about inventions as a child?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Technology advances

Paragraph 1: The way people use technology is changing quickly. Today, new devices and apps are easier to use. People can talk to machines, use hand gestures, or even use their face to control them. This helps make technology feel more natural and simple. It also improves how we use technology in our daily life and at work.

Paragraph 2: Smart machines and software are now doing boring and repeated tasks in many workplaces. These tools, often powered by artificial intelligence (AI), save time and help workers focus on more important and creative jobs. As a result, companies work better and grow faster in many fields.

Paragraph 3: More and more schools are using technology in their lessons. They teach students skills like computer coding, robotics, and how to use digital tools. These programs help students prepare for future jobs, and also build creativity and problem-solving skills, which are important in the digital world.

Paragraph 4: Using digital devices too much can cause problems. Spending too much time in front of screens can make people feel lonely, stressed, or tired. It can also make it harder to focus or talk with others. That's why it's important to have a good balance between screen time and offline activities like exercise, talking with friends, or enjoying nature.

Paragraph 5: Not everyone has the same access to technology. Some people don't have fast internet or modern devices, so they miss chances to learn or find jobs. This creates unfair gaps in society. To fix this, we need good plans and community programs to give more people access to the tools they need.

Paragraph 6: Technology communities are groups of people who love working with tech. They share ideas, help each other, and work together on new projects. These communities support learning and help turn smart ideas into real products or services that can help others.

Paragraph 7: As technology grows, people are also thinking about the environment. Many companies are now creating eco-friendly products and using green practices to reduce harm to nature. These actions help protect the Earth and make sure that digital progress is good for our planet in the long term.

HEADING	
Overreliance on Digital Interfaces	
Concerns About Disparities in Access to Technology	
Focusing on Sustainable Digital Solutions	
Boosting Productivity Through Intelligent Automation	
Building Innovative Tech Communities	
Redefining Human-Technology Interaction	
Promoting Technology-Based Education Programs	

ĐỀ 7

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

I want to [visit / clean / run] my grandparents this weekend.

My [room / father / mother] is very clean and bright.

The weather is [big / hot / small] today.

We went to the city by [spaceship / plane / train].

I can [make / speak / love] English very well.

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	Mae worked diligently and achieved several remarkable milestones.
	Her parents motivated Mae to pursue higher education and focus on scientific studies.
	Eventually, she had the opportunity to undergo a training program in the United States.
	She later joined a team, contributing her skills and knowledge.
	Mae's father worked as a nurse, and her mother was a teacher.

Question 3 of 5: Put the sentences below in the right order.

	Nowadays, engineers create smart devices for both residential and industrial applications.
	High development costs previously slowed the widespread adoption of IoT technology.
	The Internet of Things (IoT) links everyday devices to improve their capabilities.
	Early IoT devices faced limitations due to slow internet speeds and compatibility challenges.
	Modern IoT systems provide real-time data tracking and automation features.

Question 4 of 5: Here is the perspective of four people. Please read the content and answer the question.

A: When I was a child, I loved sitting by the fireplace listening to my grandfather's folktales. His voice brought every character to life, and those evenings always felt magical—they taught me the power of imagination. Nowadays, I share that same joy with my nieces by reading interactive storybooks on tablets. The animations and sounds make the stories more vivid and exciting for them. Still, I always take care to choose content that's suitable for their age. To me, blending old traditions with modern technology is a beautiful way to keep storytelling alive across generations.

B: When I was a young, I used to ride my bike around the village with my friends almost every afternoon. I can still recall the feeling of the wind brushing against my face, the excitement of racing each other, and the pure sense of freedom it brought. Those simple rides weren't just fun—they taught me what independence and adventure felt like, lessons that stayed with me as I grew up. Nowadays, it's a bit sad to see that many children spend more time indoors, glued to screens instead of exploring outside. Sometimes I find myself missing those carefree afternoons when happiness was as simple as pedaling down a dusty road. Thinking back, I realize those moments helped me develop a love for the outdoors and a lasting appreciation for friendship.

C: As a kid, I could spend hours drawing animals, trees, and landscapes with my box of crayons and pencils. I loved playing with bright colors and shapes, and I always felt proud showing my drawings to my family. What started as a simple childhood hobby slowly turned into a lifelong passion. Now, I'm a graphic designer, creating digital art for various clients. Modern design tools help me bring my ideas to life with more precision, yet the creative joy I feel is just like it was back then. For me, drawing has always been a way to express myself—and it still fills my days with happiness.

D: When I was growing up, I loved going on camping trips with my family in the countryside. We pitched our tents, cooked simple meals over a fire, and spent long nights gazing at the stars. Those moments made me feel deeply connected to nature and left me with unforgettable memories. Sometimes, though, rainy weather would ruin our plans, and I always felt a bit sad when we had to stay indoors. These days, my adventures have taken a different form — I enjoy visiting museums and exhibitions instead. Exploring history through artifacts and stories gives me a similar sense of curiosity and wonder, just in a quieter, more comfortable setting. To me, museums are a gentle way to travel through time and appreciate the beauty of the past.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who now enjoys graphic design?				
Who loved bike riding as a child?				
Who loved drawing as a child?				
Who enjoys storytelling with family?				
Who now prefers museum visits?				
Who finds modern books more engaging?				
Who loved camping as a child?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Cultural Exchange

Paragraph 1: In the modern interconnected world, understanding global cultures involves much more than simply learning about customs and traditions. It requires the development of cultural intelligence and awareness. Redefining cultural understanding means moving beyond surface-level knowledge and gaining a deeper appreciation of shared human experiences while still respecting the unique identities of different cultures.

Paragraph 2: Festivals that celebrate multiple cultures play an important role in promoting unity and inclusiveness among diverse communities. Such events create opportunities for different groups to present and celebrate their art, music, food, and cultural heritage while encouraging people to appreciate cultural diversity.

Paragraph 3: Language exchange programs are among the most effective ways to encourage intercultural communication. By participating in these programs, individuals can better understand cultural subtleties such as humor, idiomatic expressions, and nonverbal communication.

Paragraph 4: Although tourism can contribute significantly to economic development, excessive commercialization may weaken genuine cultural exchange. Many well-known destinations face the risk of being turned into commercialized attractions rather than places that reflect authentic cultural values.

Paragraph 5: The rapid pace of globalization and urban development has increased concerns about the disappearance of intangible cultural heritage. Many traditional elements such as languages, rituals, folk customs, and handicrafts are gradually fading away.

Paragraph 6: Successful cultural exchange depends strongly on mutual respect and empathy between communities. Instead of merely tolerating differences, people should aim to develop sincere understanding and appreciation of other cultures.

Paragraph 7: Interest in authentic cultural experiences is steadily increasing. Many travelers now prefer opportunities to interact with local communities, learn traditional skills, and take part in everyday cultural activities.

HEADING	
Concerns About Cultural Preservation	
Focusing on Authentic Cultural Experiences	
Redefining Global Cultural Understanding	
Building Mutual Respect Among Communities	
Promoting Language Exchange Programs	
Encouraging Cross-Cultural Festivals	
Overemphasis on Commercial Tourism	

ĐỀ 8

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

My uncle works on a [farm / compare / spare].

The children were very [run / excited / most] about the trip.

Turn [big / left / go] at the next corner.

We walked along the [water / street / cloud] to the park.

I usually [stone / drink / school] milk in the morning.

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	I decided to try a new café located at the end of the street.
	Even so, a staff member quickly noticed me and brought over the menu.
	The place was quite busy, with a lively atmosphere.
	In the end, I went for the most expensive salad on the menu.
	I was a bit surprised to see that there were only a few items to choose from.

Question 3 of 5: Put the sentences below in the right order.

	Then, we presented our topic for 10 minutes.
	After the presentation, other students asked questions.
	Finally, each group member took turns answering the questions.
	First, we prepared the materials for our group presentation.
	Throughout the presentation, we used images to explain our ideas.

Question 4 of 5: Here are four people's views. Read them carefully and answer the questions below.

A: When I was a teenager, I loved recording short stories on an old tape recorder with my cousins. We spent hours coming up with ideas and acting them out just for fun. These days, we make podcasts using modern apps that make editing and publishing much easier and more enjoyable. Even though technology has simplified the process, we still spend a lot of time planning each episode carefully. For me, podcasting is a creative way to express ideas and connect with people on a deeper level.

B: As a child, I spent many sunny afternoons flying kites in the park with my brothers and sisters. Watching my kite rise high into the sky always filled me with happiness and excitement. Those simple yet meaningful moments taught me patience and coordination. Even now, whenever I see children flying kites, I feel warm memories returning. Those carefree days will always be some of my favorite childhood moments.

C: When I was little, I was fascinated by doing jigsaw puzzles with my family. Carefully fitting each piece into place was both fun and satisfying. Now that I'm older, I often play strategy-based video games, which feel like a modern version of puzzles. They're not only entertaining but also help me stay focused and think critically. For me, these games bring the same sense of challenge and accomplishment that puzzles once did — just in a more dynamic and interactive way.

D: I grew up near a beautiful lake, and swimming there with my friends was one of my favorite things to do. It was such a great way to spend time outdoors, though rainy days sometimes left me feeling bored at home. Nowadays, I practice yoga to relax and recharge after long working hours. It has helped me stay calm, balanced, and focused. Yoga has become an important part of my routine and a great way to take care of both my body and mind.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who enjoys podcasting with friends?				
Who now prefers yoga?				
Who loved puzzles as a child?				
Who loved kite flying as a child?				
Who finds modern apps easier to use?				
Who loved swimming as a child?				
Who now enjoys video games?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Urban Development

Paragraph 1: Modern urban development increasingly focuses on sustainability as cities face growing populations and environmental challenges. Redefining sustainable city planning means integrating environmental protection, efficient land use, and long-term economic growth into urban strategies. Planners aim to design cities that balance development with ecological responsibility while improving residents' quality of life.

Paragraph 2: One key aspect of sustainable city planning is the creation of more green spaces. Parks, urban forests, and community gardens help reduce pollution, improve air quality, and provide residents with areas for recreation and relaxation. Green spaces also contribute to better mental health and create a healthier living environment in densely populated cities.

Paragraph 3: As cities expand, ensuring access to affordable housing becomes a major priority. Governments and developers must work together to create housing projects that are accessible to different income groups. Affordable housing helps reduce inequality and allows more people to live closer to workplaces, schools, and essential services.

Paragraph 4: However, rapid urbanization has led many cities to depend heavily on high-rise developments to accommodate population growth. While tall buildings can maximize land use, excessive reliance on them may reduce community interaction and place pressure on infrastructure. Balanced urban design should combine vertical development with livable neighborhood spaces.

Paragraph 5: Another challenge linked to rapid urban growth is increasing traffic congestion. As more people move into cities, transportation systems often struggle to keep up with demand. Long commuting times, air pollution, and road overcrowding can negatively affect both the environment and residents' daily lives.

Paragraph 6: To address these challenges effectively, community participation plays an important role in urban planning. Local residents can provide valuable insights into their needs and priorities. When communities are actively involved in decision-making, city policies become more inclusive and better suited to real-life conditions.

Paragraph 7: Finally, sustainable urban development requires a transition toward renewable energy sources. Cities are increasingly investing in solar power, wind energy, and energy-efficient infrastructure to reduce carbon emissions. By adopting clean energy solutions, urban areas can move closer to becoming environmentally responsible and resilient for the future.

HEADING	
Redefining Sustainable City Planning	
Encouraging Green Spaces in Urban Areas	
Supporting Affordable Housing Projects	
Overreliance on High-Rise Buildings	
Concerns About Traffic Congestion	
Strengthening Community Engagement	
Focusing on Renewable Energy Source	

ĐỀ 9

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

I usually stay at [cloud / home / road] on Sundays.

My father can [fly / drive / big] very well.

I like spending time with my [tree / friends / go] after school.

Let's go for a [walk / big / sea] in the park.

Your sister looks very [pretty / father / went] today.

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	Encouraged by her parents, she decided to study science at university.
	Her strong academic record earned her a place in a training program in the United States.
	Some of these experiments involved growing plants and observing animals aboard the spacecraft.
	Her passion for space led Mae to join a dedicated research team.
	As a member of the team, she traveled into space and carried out numerous experiments.

Question 3 of 5: Put the sentences below in the right order.

	Today's platforms use complex algorithms to personalize and shape each user's feed.
	Over time, social media platforms have greatly evolved in both design and functionality.
	In the past, slow internet speeds made streaming or uploading videos difficult.
	Early platforms offered only basic features like text posts and simple images.
	Many influencers now earn income primarily through brand sponsorships and online ads.

Question 4 of 5: Here are four people's experiences about choosing or starting their careers.

Read carefully and answer the questions below.

A: When I first graduated from school, I wasn't sure what to do, so I joined several volunteer programs with different companies and organizations to gain experience. I really enjoyed volunteering because it helped me decide on a career path and gave me many valuable lessons. I also believe I was able to make a difference through my work.

B: Back in school, I already knew I wanted to become a teacher, so I didn't need to try other jobs. I decided to study education at university, which is free in my country. Last summer, I did some practical training in local schools, and it was extremely helpful for my future career.

C: When I was young, I used to help my neighbor, a plumber, with simple jobs like measuring pipes, loosening screws, and handling tools. It felt very natural for me to learn that kind of work, so later I studied for two years at university to become an electrician. Now, I've learned that there are shorter courses available in this field, and I regret not choosing that option instead.

D: After graduating, I found it really difficult to get a job. I applied to many companies, but none accepted me because I lacked experience. Eventually, I found work at a gaming company that allowed me to work from home. It didn't affect my daily schedule — I worked at night while my colleagues worked during the day — and that arrangement suited me perfectly.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who enjoys working during their training?				
Who thinks they benefited from working for free?				
Who did not want to choose another job?				
Who thinks it is very hard to get your first job?				
Who thinks their training was too long?				
Who enjoys working in a flexible working environment?				
Who likes working with their hands?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Digital innovation

Paragraph 1: In today's digital age, technology has fundamentally transformed the way people experience leisure. It has changed how individuals relax, interact with others, and consume entertainment. With innovations such as on-demand streaming services and virtual reality gaming, users can now enjoy highly customized entertainment experiences that match their personal preferences. Nevertheless, these technological advances can blur the line between work and leisure, as smartphones and online platforms constantly compete for people's attention. Therefore, redefining leisure in the modern digital world involves finding a balance between technological convenience and maintaining offline well-being, ensuring that technology improves quality of life rather than creating excessive dependence on digital devices.

Paragraph 2: Mobile applications have emerged as powerful tools that strengthen global connectivity. They have significantly changed the way people communicate, cooperate, and build relationships. Through services such as instant messaging, video calls, and AI-powered social platforms, mobile apps allow individuals to interact instantly regardless of geographic or cultural distances. In addition to supporting personal communication, app ecosystems also facilitate professional networking, online education, telemedicine, and international trade. However, the increasing dependence on these technologies can also create challenges, including digital exhaustion and fierce competition for users' attention. To fully realize their advantages, developers should design applications that emphasize accessibility, inclusiveness, and smooth integration into everyday life.

Paragraph 3: As the world becomes more digitally oriented, digital literacy has become a crucial competency for education, career development, and civic engagement. This skill goes beyond basic technical knowledge and also includes the ability to think critically, evaluate information sources, and behave responsibly in online environments. Educational institutions, businesses, and governments need to work together to create initiatives that help individuals effectively navigate digital platforms, protect their personal data, and identify misinformation. Reducing the digital divide is especially important so that disadvantaged communities can also access economic and social opportunities. Strengthening digital literacy ultimately promotes equal access and prepares people for success in an increasingly technology-driven society.

Paragraph 4: Although modern technology has greatly expanded entertainment options, excessive dependence on screen-based activities can lead to serious health and social problems. Spending long periods using smartphones, playing video games, or watching online streaming content may cause eye strain, disrupted sleep patterns, decreased physical activity, and shorter attention spans. On a social level, people may feel isolated if digital entertainment replaces meaningful real-life interactions. Addressing these concerns requires a balanced strategy that encourages digital well-being, promotes outdoor activities, and supports mindful media

consumption. As technology continues to evolve, society must redefine healthy forms of entertainment that provide benefits without harming physical or mental health.

Paragraph 5: The rapid expansion of digital technologies has intensified discussions about protecting personal data. As AI-based services, online shopping, and social media platforms grow quickly, users frequently share sensitive information, often without fully understanding the potential consequences. Issues such as data breaches, unauthorized monitoring, and algorithm-based profiling have raised worries about surveillance, misuse of information, and reduced personal autonomy. To address these risks, governments, technology companies, and advocacy organizations need to cooperate in establishing stronger data protection regulations, improving transparency, and giving users greater control over their personal information. In a world where data is increasingly valuable for innovation, safeguarding privacy is vital to maintaining trust and ethical technological development.

Paragraph 6: Online platforms have the potential to connect individuals from around the world, but they can also intensify division, misinformation, and exclusion if they are not properly managed. Creating inclusive digital communities requires thoughtful design that ensures people from various backgrounds feel respected and represented. This process involves addressing problems such as cyberbullying, hate speech, and bias in algorithms, while also ensuring fair access for underrepresented groups. Social media platforms and community-based applications should emphasize transparency, diversity, and cooperative governance, allowing users to influence the standards of online interaction. When inclusivity becomes a central design principle, digital environments can encourage meaningful connections rather than deepen social fragmentation.

Paragraph 7: In a time of rapid technological progress, intuitive and user-friendly design has become a key factor in the success of digital products. An effective interface is not only visually appealing but also simplifies complex systems, improves accessibility, and ensures that technology supports users instead of overwhelming them. Many companies now follow human-centered design principles by using user feedback, behavioral data analysis, and accessibility testing to develop products that address a wide range of needs. Focusing on usability not only increases customer satisfaction but also encourages digital inclusion, ensuring that technological innovation remains practical, engaging, and accessible to people of all ages, abilities, and levels of technical expertise.

HEADING	
Promoting Essential Digital Literacy	
Concerns About Data Privacy	
Redefining Leisure in the Digital Age	
Enhancing Connectivity with Mobile Apps	
Prioritize human-friendly designs	
Risks of Excessive Screen-Based Entertainment	
Building Inclusive and Respectful Online Communities	

ĐỀ 10

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

I want to travel to the [country / small / big] this summer.

Please keep your room [green / boring / clean].

We have English [class / lunch / sea] on Monday.

I like helping [myself / father / other] people.

Can you spell these [small / bring / words] for me?

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	You'll need to show this card to enter the introductory talk and morning lectures.
	Using this information, we'll prepare an identification card for you to collect upon arrival.
	After the presentations, you'll be able to explore different departments across the campus.
	Before the open day, please contact us by phone or email so we can record your personal details.
	Every visitor will have the chance to join a Q&A session with current students.

Question 3 of 5: Put the sentences below in the right order.

	Early AI systems were capable of handling only simple pattern recognition tasks.
	In the past, high computational costs slowed down the progress of AI development.
	Over the past decade, artificial intelligence has reshaped industries around the world.
	Modern AI tools enable businesses to analyze vast amounts of data and make smarter decisions.
	Today, AI engineers design sophisticated models for applications such as language translation.

Question 4 of 5: Here are four people's opinions. Read carefully and answer the questions below.

A: I went to the festival, but on the first day, I didn't enjoy it much. It felt a bit dull and not very exciting. Still, the stage was bright with lights and fireworks, and the overall atmosphere was unforgettable. The music lifted my mood and made me feel truly happy. Interestingly, by the final day, everything seemed different—I began to enjoy it a lot more. In the end, I was really glad I decided to go.

B: I've been to this festival every year, and of course, I joined again this time. But honestly, I didn't enjoy the music, and the weather made things worse. It kept raining, turning the ground muddy and uncomfortable for everyone. After this experience, I think I won't go again next year.

C: I absolutely loved the energy of the music and enjoyed every part of the program from start to finish. Although it rained a little, it didn't bother me at all. The only thing I didn't like was the expensive ticket — I spent more than I had planned. Despite that, I still had a great time and hope the organizers consider lowering the price in the future.

D: I was one of the musicians performing on the first day of the festival, and I also met several familiar bands there. Even though I only played a few songs, I stayed until the event ended. The pay wasn't great, but I really enjoyed myself because I got to reconnect with friends. However, I'm still thinking about the long travel distance since the venue was quite far from the city center.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who thought it was expensive?				
Who only liked the last day?				
Who didn't like the festival overall?				
Who thought the location was not good?				
Who enjoyed the music throughout all the festival?				
Who was disappointed with the weather?				
Who met old friends again?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Women mathematicians (phiên bản 2)

Paragraph 1: Achievements often go unnoticed when gender biases come into play. Many groundbreaking contributions from women in science, technology, and other fields are overshadowed by societal expectations, leading to a lack of recognition for their hard work and dedication.

Paragraph 2: Recognizing the accomplishments of pioneering women is essential for breaking stereotypes and inspiring future generations. Women like Marie Curie, Ada Lovelace, and Katherine Johnson changed the world with their brilliance, yet their achievements were often marginalized due to their gender.

Paragraph 3: Men are unfairly given credit for work that was often a joint effort or even led by women. History has been shaped by this bias, where the achievements of women were either ignored or misattributed, despite their immense contributions to progress.

Paragraph 4: A long career is a testament to one's exceptional abilities. Take the story of a female engineer who spent decades improving infrastructure in underdeveloped regions. Despite her groundbreaking work, she was often overlooked simply because of her gender, but her work left an indelible mark on society.

Paragraph 5: Labels can change perceptions dramatically. The label of 'genius' or 'pioneer' is often reserved for men, but when a woman is labeled in the same way, it challenges stereotypes and forces society to recognize her contributions. This shift in perception is key to breaking down barriers and opening doors for others.

Paragraph 6: Striving to create gender balance in the workplace and society at large has become a movement. Companies and governments are starting to realize that diverse teams lead to better solutions, yet the struggle for equal representation continues. The push for gender balance is not just about fairness but also about enhancing productivity and creativity.

Paragraph 7: Uniformity can be a disadvantage in many settings. When everyone is expected to conform to the same mold, innovation and individuality suffer. The story of a diverse team at a tech startup shows how embracing different perspectives led to creative breakthroughs, proving that diversity is a powerful asset.

HEADING	
Recognizing the accomplishments of pioneering women	
The labels can change perceptions	
Uniformity can be a disadvantage	
Achievements obscured by gender	
Men are unfairly given credit	
A long career demonstrates exceptional ability	
Striving to create gender balance	

ĐỀ 11

Question 1 of 5: Choose the word that fits in the gap. The first one is done for you.

Hey Lewis,

My bedroom is very [boring / small / healthy].

We usually [stay / movie / bring] at a hotel on vacation.

There are many flowers in the [sky / garden / water].

Some [cloud / trees / morning] near my home are very tall.

My grandfather is very [hot / old / free] but still strong.

Love,

Helen

Question 2 of 5: Put the sentences below in the right order.

	Years ago, limited access to fresh produce made healthy eating more difficult.
	Nutritionists today teach people how to plan balanced and nutritious meals.
	Nowadays, mobile apps help users track calories and discover healthy recipes.
	Modern diets now focus on fresh, whole foods instead of processed ones.
	In the past, many meals were high in sugar and unhealthy fats.

Question 3 of 5: Put the sentences below in the right order.

	The wellness fair took place on Saturday afternoon, encouraging people to adopt healthier lifestyles.
	The fair also included activities like cooking demonstrations, mindfulness sessions, and a fun run.
	After the workshops, prizes were awarded to participants who created the most creative health posters.
	More than 60 participants joined the event, with Dr. A leading an engaging fitness workshop.
	Families enjoyed tasting healthy snacks and discovering practical tips for better overall wellness.

Question 4 of 5: Here are four people's opinions about the same topic. Read carefully and answer the questions below.

A: I went to the festival, but on the first day, I didn't enjoy it much. It felt a bit dull and not very exciting. Still, the stage was bright with lights and fireworks, and the overall atmosphere was unforgettable. The music lifted my mood and made me feel truly happy. Interestingly, by the final day, everything seemed different—I began to enjoy it a lot more. In the end, I was really glad I decided to go.

B: I've been to this festival every year, and of course, I joined again this time. But honestly, I didn't enjoy the music, and the weather made things worse. It kept raining, turning the ground muddy and uncomfortable for everyone. After this experience, I think I won't go again next year.

C: I absolutely loved the energy of the music and enjoyed every part of the program from start to finish. Although it rained a little, it didn't bother me at all. The only thing I didn't like was the expensive ticket — I spent more than I had planned. Despite that, I still had a great time and hope the organizers consider lowering the price in the future.

D: I was one of the musicians performing on the first day of the festival, and I also met several familiar bands there. Even though I only played a few songs, I stayed until the event ended. The pay wasn't great, but I really enjoyed myself because I got to reconnect with friends. However, I'm still thinking about the long travel distance since the venue was quite far from the city center.

Read the four opinions posted in the forum. Then, answer the questions.

QUESTION	A	B	C	D
Who met old friends again?				
Who only liked the last day?				
Who enjoyed the music throughout all the festival?				
Who thought it was expensive?				
Who didn't like the festival overall?				
Who was disappointed with the weather?				
Who thought the location was not good?				

Question 5 of 5: Read the passage quickly. Choose a heading for each numbered paragraph (1–7) from the drop-down box. There is one more heading than you need.

Topic: Mountain (phiên bản 2)

Paragraph 1: In the modern consciousness, the definition of a mountain has evolved far beyond its geological description as a massive landform of rock and ice. Historically viewed as sacred barriers or purely natural entities, mountains are increasingly defined by humans as 'vertical arenas' for personal testing. This conceptual shift transforms the mountain from a part of the ecosystem into a commodity — a challenge to be overcome rather than a landscape to be respected.

Paragraph 2: This new definition is driven by a powerful psychological reward: the unique feeling of achievement. When a climber pushes their physical limits to reach a summit, the combination of exhaustion and altitude creates a potent cocktail of adrenaline and pride. It is a singular sensation of conquering the impossible, offering a temporary escape from the mundane routines of daily life. This internal 'high' creates a deep-seated desire to return.

Paragraph 3: However, in our hyper-connected era, internal satisfaction is rarely enough; it is the publicity of achievement that now drives the masses. The solitude of the peaks is often broken by the need to document and broadcast the success on social media. The mountain becomes a backdrop for digital validation, where the value of the climb is measured in likes and shares rather than personal growth.

Paragraph 4: The obsession with public recognition inevitably establishes the wrong priority. Instead of prioritizing safety, skill acquisition, or the appreciation of nature's subtle beauty, many climbers become fixated solely on 'bagging the peak'. This 'summit fever' encourages rushing, dangerous shortcuts, and a lack of preparation. The journey itself is ignored in a frantic race to the top, reducing the majestic experience to a mere checklist item.

Paragraph 5: This distorted mindset leads to a disturbing reality — a troubling reality where our ego directly impacts the environment. As more people flock to the mountains with the wrong priorities, we witness a direct correlation between human traffic and environmental degradation. Trails are eroded, campsites are littered with non-biodegradable waste, and delicate wildlife habitats are disturbed.

Paragraph 6: Facing this ecological crisis, the mountaineering community is being forced to shift its focus on sustainability. We are realizing that the mountains are finite resources that cannot withstand endless abuse. This creates a new imperative: implementing stricter limits on climber numbers, enforcing 'leave no trace' policies, and promoting ethical tourism. The goal is shifting from conquering the land to preserving it.

Paragraph 7: Ultimately, this move toward preservation fosters a more intimate relationship with the mountain. When we stop viewing the peak as an enemy to defeat or a trophy to display, we begin to see it as a partner. This new relationship is built on humility, silence, and deep respect for the natural world. We learn to climb not just to stand on the mountain, but to be with the mountain.

HEADING	
The wrong priority	
A more intimate relationship	
Changing the definition of mountain	
The unique feeling of achievement	
Focus on sustainability	
A disturbing relevant	
Publicity of achievement
